

2025 Academy Engagement Opportunities

Connecting with Nutrition and Dietetics Professionals

The Academy of Nutrition and Dietetics is the world's largest organization of nutrition and dietetics professionals founded in Cleveland, Ohio, in 1917, by a visionary group of women dedicated to helping the government conserve food and improve the public's health and nutrition during World War I.

Today, the Academy represents 112,000 credentialed practitioners — registered dietitian nutritionists, nutrition and dietetics technicians, registered, and other dietetics professionals holding undergraduate and advanced degrees in nutrition and dietetics, and students — and is committed to improving the nation's health and advancing the profession of dietetics through research, education and advocacy.

Mission

Accelerate improvements in global health and well-being through food and nutrition.

Vision

Registered Dietitian Nutritionists

Optimizing Health through Food and Nutrition

Registered dietitian nutritionists (RDNs) are nutrition and dietetics professionals who translate the science of nutrition into practical solutions for healthy living. Working in a number of practice settings, RDNs advance the nutritional status of their patients and clients.

Expertise

RDNs receive extensive training that combines academic preparation with hands-on, practical patient experience.

They must complete a minimum of a bachelor's degree, participate in an accredited practice program involving direct patient interaction, and pass a national registration exam. RDNs are also required to complete continuing professional education to maintain their credential. In addition:

- Over **half of RDNs hold a graduate degree** (57% Master's and 4% Doctoral)
- **29% of RDNs indicated holding one or more specialty certifications**

Improved Outcomes

Medical Nutrition Therapy (MNT) works. Registered Dietitian Nutritionists (RDNs) and other nutrition professionals, know that providing safe, timely, and effective nutrition care is essential to not only treating and managing many chronic disease and conditions, but it is also a crucial component of preventative care.

Improved health outcomes using medical nutrition therapy (MNT) have been published in dyslipidemia, adult weight management, celiac disease, cystic fibrosis, and chronic kidney disease.

Trust

Physicians, clients, patients, industry and government agencies value and trust the contributions of RDNs.

- Over **81% of RDNs have direct interaction** with clients or patients.
- Over **72%** indicated that **other health care professionals refer to them.**
- **72% of RDNs** believe their **clients follow their advice closely.**
