

Evaluation of Distance Education Program

Use this evaluation tool to collect evidence and include the evidence in your self-study or site visit report

<p>Distance Education Definition: Distance education is defined as the delivery of instruction, which includes any didactic courses in the professional curriculum and residency experiences where students are separated from instructors and/or program directors. The program must use one or more of the technologies listed under general requirements to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor, either synchronously or asynchronously.</p> <p>Regular and substantive interaction is engaging students on a regular basis in teaching, learning and assessment, consistent with the content under discussion, and includes at least two of the following: providing direct instruction; assessing or providing feedback on a student's coursework; providing information or responding to questions about the content of the course or competency; facilitating a group discussion regarding the content of a course or competency; or other instructional activities approved by ACEND. A regular and substantive interaction between the student and the program director/instructor must be reasonably frequent and consistent (at least once per week; may include advising), primarily initiated by the program director/instructor, related to the dietetic program/course, and provide useful/meaningful information to the student.</p>
